This assessment can be used to determine your pet's quality of life. As pets age, you will notice they have good and bad days. It's important to notice any irregular patterns in your pet's health so your veterinarian can make your pet comfortable during their last days. This assessment may also help you determine if its time to avoid unnecessary suffering through humane euthanasia.

# Daily Quality of Life Assessment

| *Date* | *Elimination*<br>*2 – Normal*<br>*1 – Irregular*<br>*0- None* | *Hydration*<br>*2 –Adequate*<br>*1 – Poor*<br>*0- Requires SQ Fluid* | *Interaction*<br>*2 – Normal*<br>*1 – Some*<br>*0- Hides* | *Mobility*<br>*2 – Normal*<br>*1 –Some Difficulty*<br>*0- Minimal movement* | *Nutrition*<br>*2 – Normal Appetite*<br>*1 – Poor Appetite*<br>*0- No Appetite* | *Daily Total*<br>*10-8 Overall doing well*<br>*7-5 Requires Intervention*<br>*4 or < Consider Euthanasia* |
